

Telstra wireless broadband Save up to \$299 device rebate

+

12 months half price on 24 month contract

What is the wireless mobile card?

Whether you're at home, in the office, or even commuting in a taxi or train – you can browse the web or manage your emails in capital cities and major regional centres in Australia.

The wireless broadband mobile card gives you access to the internet at super fast speeds of up to 1.5Mbps* (depending on the plan you choose and when in a wireless broadband coverage area) while you're on the move.

* Actual user speeds vary.

What is a wireless broadband modem?

The BigPond wireless broadband modem gives you easy, convenient access to the internet. It uses Telstra's 1xEVDO wireless broadband network, enabling you to experience true broadband, just like cable and ADSL.

Benefits

- Easy** – Perfect for moving home or office
- Convenience** – Start using your internet service today
- Freedom** – No phone line or cable connection required*
- Reliability** – Australia's largest ISP

*Wireless broadband modem requires a power point

How does it work?

The wireless broadband mobile card utilizes one network to deliver wireless internet access.

Broadband network

Using Telstra's Next G™ network, the wireless broadband mobile card can access the network at BROADBAND speeds in Australian capital cities and many major regional centres, providing speeds of up to 512kbps (depending on your plan).

* Actual user speeds vary

Monthly plans and prices

Plan	Speed	Usage Allowance	Plan Price Per Month (on 36 month contract)	Discounted Rate (for first 12 months)
